

Sora has digital books for your curriculum

ELA essentials, award winners & more to help remove reading barriers

Budget shortfalls, unequal access to print books, tech issues, time constraints — these are just some of the limitations that can hold your students back from reading and learning success.

But Sora can help you eliminate these barriers. Sora is a digital reading platform that delivers affordable, data-driven access to the right curriculum ebooks and audiobooks for your school.

Whether you've built your own curriculum or align with a high-quality instructional materials (HQIM) program, Sora offers a simple, step-by-step approach to helping you reach your reading and learning goals:

1 Send us your list of required & supplemental reading

The first step is simple – just send us your title list! Sora is backed by an industry-best catalog of millions of titles from thousands of publishers, including high-quality curriculum books, popular reading, translated and authentic texts in world languages, and more. And if we don't have a title you need in digital, just let us know — we'll work with the publisher to get it added as soon as possible.

Plus, books are available in formats like audiobooks, Read-Alongs, picture books and comic books and graphic novels that can help you reach readers of all ages and abilities.

We collaborate with top curriculum vendors to supply required digital books

2 We'll work with you to optimize your budget with our flexible book purchasing & delivery options

How many kids need books? For how long? We can analyze your list and work with you to build a customized, cost-effective digital book plan for your teaching units, book clubs and more.

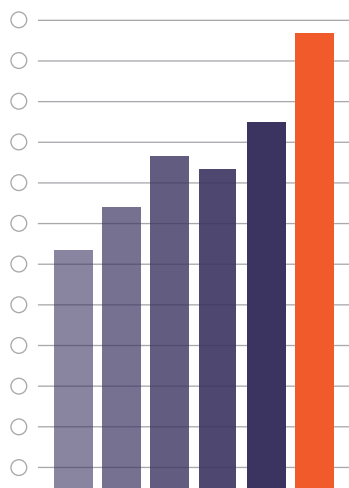

And once we do, Sora offers flexible purchasing options like On-Demand Class Set Rentals that allow you to stick to a budget and deliver top titles to your students. Titles are delivered quickly, and can never be lost, damaged or stolen.

3 Books are deployed to kids

With Sora, every student has a copy of the book. They can read 24/7, no matter where they are, on the device of their choosing. Plus, books can be downloaded and read offline – so reading access is never dependent on an internet connection.

4 Use reading data to track engagement & take advantage of free services

We're your partner in success and give you the tools to get the most impact out of your digital books.

Reading data & insights

Sora can track reading data like books opened, time spent reading and more to help inform your purchasing and intervention strategies.

Free services & support

Your dedicated team of support staff will help guide you through every step of implementation, adhering to the strictest possible standards to protect your students' privacy along the way. You'll also have access to staff and student training, curated collections and title selection assistance, marketing and outreach support, tech experts and product specialists.

Want to learn more about how Sora can help streamline your curriculum? Contact your Sora team or schools@overdrive.com

"OverDrive worked hard to help us be strategic within our budget to get our students one-to-one access to our anchor texts and a circulating collection of supplemental texts...When demand is high for certain titles, we can be responsive to student interest in a matter of hours."

- Kim King, Director of Virtual Learning & Media Services, Charlotte-Mecklenburg Schools
